CROTON AQUEDUCT.

HISTORY.

In the year 1793, Dr. Joseph Brown proposed to supply the City of New York with water, by bringing the river Bronx to Harlem in an open canal, raising it to the required height by steam, and conducting it to the city in a six inch pipe. Propositions have since been made by William Weston and others, with reference to the same source. The CROTON was first recommended in the year 1832, by Col. Dewitt Clinton. In 1833, the Legislature authorized surveys. In 1834, a permanent board of Water Commissioners was organised. In 1835, Feb. 16th, the report of Stephen Allen, Wm. W. Fox, Saul Alley, Charles Dusenbury, and Benjamin M. Brown, Water Commissioners, was made, recommending the work as constructed.-- Surveys by D. B. Douglas and John Martineau, in 1833, and 1834. March 4th, 1835, plan adopted by the Common Council. April 13th, the citizens decided by a distinct vote that the work should be constructed. May 7th, the Commissioners were directed to proceed -- Water introduced July 4th, 1842. THE AQUEDUCT commences at the CROTON River, five miles from the Hudson, in Westchester County. The DAM is 250 feet long, 70 wide at bottom, and seven at top, height 40 feet, built of stone and Cement. It sets the river back five miles, covering 400 acres, and holds five hundred millions of gallons. From the dam the aqueduct proceeds, sometimes tunnelling through a solid rock, crossing valleys by embankments, and brooks by coverlets, until it reaches Harlem River, a distance of 33 miles. It is built of stone, brick, and cement, arched over and under, 6 feet 9 inches wide at bottom, 7 feet 5 inches at top of side walls, and 8 feet 5 inches in height. It will discharge in 24 hours, sixty millions of gallons; descent 13½ in. per mile. It will cross the Harlem River on a MAGNIFICENT BRIDGE OF STONE, 1450 feet long with 15 arches, 8 of 80 feet span, and 7 of 50 feet span. From high tide to summit of arch 100 feet, to top of bridge, 114 feet, cost about nine hundred thousand dollars. Water is at present conducted in an iron pipe laid as an inverted syphon. THE MANHATTAN VALLEY, at Harlem, is passed by two inverted syphons of cast iron, 3 feet in diameter descending 105 feet below the grande line; 2½ miles from termination of aqueduct of masonry, it passes CLENDENING VALLEY, with arches over streets and sidewalks about 40 feet high. The RECEIVING RESERVOIR is at 86th street, 38 miles from the DAM, it covers 35 acres and contains 150 millions of gallons. The water is conveyed to the DISTRIBUTING RESERVOIR on Murray's Hill, 40th street, in iron pipes. It is 41 miles from the dam, covers four acres, built of stone and cement, height 43 feet above the street, resembling a spacious castle or fort. It holds 20 millions of gallons. From this reservoir iron pipes are laid under ground through the city. Water will rise in any part 114 feet above tide, nearly as high as the clock of the City Hall. Over 110 miles of the pipes are already laid. The whole cost will be about TWELVE MILLIONS of DOLLARS.

SELECT CLASSICAL ENGLISH SCHOOL.

Elizabethtown, N. J.

The above institution is essentially a school, where a small and limited number of boys are received into the family of the Principal, and are under his constant supervision. Every attention is given, not only to the training of the mind in the acquisition of useful knowledge, but also to the formation of a correct moral character. In the Government of the school, moral motives are brought to bear upon the conduct of each: and no student is retained when it is found by experience that, by his private conduct or general deportment, he is exerting a deleterious influence over his fellow students. The school is located in a retired and healthy spot in Elizabethtown, and has been in operation for several years past. Any person desirous to place their sons in such an institution, can, on application, be referred to a number of gentlemen in Elizabethtown and other places, who have for some time past been its patrons.

TERMS.—For Board, Washing, and Tuition, either in the English or Classical branches, \$165 a year, payable in all cases quarterly in advance. Each student to furnish his own bed and bedding, or charge will be made for their use.

PIERSON'S NEWARK CITY DIRECTORY.

FOR THE
68th YEAR OF AMERICAN INDEPENDENCE,
FROM 4th OF JULY, 1843.

Important observations to those using this work.

Throughout this Directory, the christian names of those where there are more than one of the same surname, are carefully alphabetically arranged, male and female, firms, &c. In searching for a name, the inquirer must know the proper spelling. For example, a person seeking for—Pirsson, will not find the one sought for if he looks in the names of Pierson; so, also, for—Bonnel, he should not look among the Bunnels; and for Conger not in Congar; and for Parcels not look in Parsals or Parcells: nor for Hays in Hayes.

ARNOLD'S PATENT WASHING MACHINE.

Some of the advantages of this Machine are: It saves half the time and labor of the individual who washes; it does not wear out the clothes, while it gives them a degree of whiteness which the usual method of washing does not; it economizes half the soap and water, and is so small and simple in its construction that it costs but little, and cannot easily wear out, or get out of order. But more than this, the testimony of all who have proved it by use is decidedly in its favor, and it is gratifying to know that this testimony is from the most competent judges, both in the city and country.

DIRECTIONS.

Select for the first suds, the clothes least soiled; apply soap as usual, and throw them loosely into the machine forward of the dash; (if folded, or spread out lengthwise, the machine will not cleanse them as thoroughly, nor work as easily;) put in a quantity of clothes equal to four or five sheets, more or less, as you choose. The Pitman, which connects the dash and lever, has two holes in one end, and is to be used in the lower hole, except when there is a small quantity of clothes, then shift it to the upper hole. Particular attention should be paid to regulating the water in the machine. If there is too much water the clothes will slip up, and the purchase is lost on them, and if there is not enough, the clothes will not roll. Put in water only sufficient to cause them to roll easily when the machine is worked. Stand back of the machine and work it ten minutes, raising the lever every time until the lever lightly touches the back of the machine, and then pressing it down until it rests below; then wring them out and put others in the same water in the same manner. Repeat the process, using the water scalding hot, when they are ready for boiling. If clothes are very much soiled, repeat the process. After the clothes are boiled, put them in the machine to suds them. Large articles, such as bed quilts, need not be taken out of the machine until they are washed, sudsed and rinsed.

This my ninth edition of **THE NEWARK CITY DIRECTORY** comes forth under (*decidedly*) more favorable auspices, from the fact that 7-8ths of those who were here last year, are to be found *somewhere* this year, and many wealthy men are coming in who do business in New York. There were 4,700 names last year; this year there are 5,050—some 350 more—which adds about one thousand to our population. There have also been built the last 15 months 105 buildings of different kinds, of which I promised to give an account, viz;

Last year I published the Constitution of the United States: This year, the National Executive army of 740 men at Washington, with their salaries, that you may see where our money goes. No wonder the Treasury is bankrupt. When we add to this, the thousands of officers, *Sub and Leg Treasurers*, in the U. S., and the *story is told*. I have given an abbreviated statement of the N. J. Banks as reported to the Legislature in 1842; a History of the great CROTON Aqueduct; a List of the General Travelling routes; and the Index, alphabetically arranged, which will be found a great convenience. The Ladies will recollect that next February has 29 days; and here I would make one *painful* remark, viz that those females who have had their names in the Directory for years, should now refuse to give their names, saying, "Any one, who wants to see me, knows where I live. I am not going to stay here long. I don't want my name to be so conspicuous." *When!* Either of them would be glad to get a chance of charging some one from *three to six* dollars per week for their services. It, to my mind, shows a *weakness*. I am almost daily called on to know where females are to be found, who work in the different branches of dry goods. That we have been in many cases *shamefully* and *wilfully* misinformed, there is no doubt. I will now conclude by saying that my work has been performed FAITHFULLY and PROMPTLY, and all I now ask of our citizens is, TO DO UNTO ME, AS THEY WOULD THAT OTHERS SHOULD DO UNTO THEM.
